Operator Audit Report
Print Date 05/07/03
Transaction Period 05/04/03 - 13/04/03

Operator	Card No.	Machine ID	Date & Time
Operator: Chris Wright	123456789		

Product Description

- 6.0mm S/S Drill
- M5 x .8p S/Fluted Tap
- Eyes Protectors
- 8mm Allen Key
- Insert CNMG 120408QM
- Loctite 571

Operator: David Walker

- 6.5mm 200 series Collet
- Dormer 3.2 S/S Drill
- 4.0mm Stub Drill

Product Audit Report
Print Date 05/09/03

Toolvend Ltd was formed in 2003 to market a full range of secure “point of use” supply systems for the controlled issue and tracking of high value/high volume tooling, consumables and PPE equipment, providing concise consumption and usage trend reporting.

With a joint background of over 50 years in engineering distribution, precision engineering and specialist machine tool sales, the two founding directors have a total understanding of the logistic needs of today’s manufacturing environments and therefore the Toolvend system has been developed as a low cost 24/7 solution.

Simple, low cost solutions

5 levels of cost saving associated with Toolvend 24/7 secure dispensers...

- 1** Operators do not need to seek authorisation to issue tools from conventional manned stores areas and incur time away from production
- 2** Reduction of stock and elimination of build up of slow moving or obsolete stock
- 3** Elimination of unauthorised withdrawals resulting in tracking and location problems
- 4** Lower purchasing administration costs
- 5** Elimination of operatives creating personal hoards of tooling, often resulting in denial of production critical items to other shifts, operators and departments

Features & benefits

- Secure 24/7 availability
- Elimination of unauthorised retrievals
- Value added service
- Point-of-use convenience
- Increases stock accuracy
- Reduction in stock-level administration
- Flexible Toolvend lease finance
- Optional cost centre allocation via either keypad or barcode reader
- Reduces production down-time of retrieving and searching for tools
- Generates three distinct audit management reports
